CORE COMPRESSION TESTER- DIGITAL

Model :- PCCCT – 1

PRODUCT INFO :

Pacorr Core compression measures the side-to-side crush resistance of composite tubes and cores by compressing them to failure. Prior to testing, measurements are recorded of the core diameter, wall thickness and core length. The cores are then placed into a compression tester and crushed at a constant speed. The instrument has Peak Load facility so that it captures the Peak Load during testing.

TECHNICAL DATA :

- Capacity: 1000Kgf
- Display: LCD with Backlit
- Accuracy: ± 2% full scale of FSD
- Least Count: 100gm
- Power: 220V, Single phase, 50 Hz
- Test Plate Dimensions: As per the Core/ Cone Specifications.
- Speed Drive: 10mm/min to 100mm/min.

FEATURES:

- Microprocessor based display for accurate test results
- Highly accurate test results under uniform compression Force
- Rugged double column structure.
- TARE and Peak Hold Facility Available
- Over travel protection
- Strong base plate with rugged structure
- Digital Display LCD with backlit
