

PI Tape

Product Info :

PI tape manufacturers and suppliers have been providing a very accurate and precise measuring instrument that is vastly used in a lot of industries. In the industries, most of the times, there is a requirement of taking measurement of different dimensions with great accuracy for the purpose of quality control. It is very important for the manufacturers of different products to ensure that the quality of the products they are delivering to the consumers is of best level and measurement of the dimensions is one of the most important factors that contribute to the better quality of the products. One dimension that very hard to measure in some products is the diameter of a cylinder. The PI tape can be used for accurate measurement of the diameter of any cylindrical product. The instrument has a range of measurement varying from 20mm to 300mm.

Pacorr comes under the list of best PI tape manufacturers and suppliers that have been providing the best quality of measuring instrument to the industries of different verticals. In industries, taking measurement is a daily task that needs to be performed on regular basis and with high levels of precision and accuracy. Only with accurate measurements, it is possible that the products manufactured in the industries are of the best quality and can provide best of their performance. In some cases, if the measurements are not accurate, it can lead to malfunctioning of the products and even its failure. IT be very tricky sometimes to measure the diameter of the cylinder with accuracy as it is not always possible to measure it with the help of conventional methods. If the measurement are not taken precisely, it can contribute to bad quality and hence rejection of the products eventually.

TECHNICAL DATA :

- Model: PCPIT
- Material: High Strength Steel
- Diameter: 20-300 mm
- Circumference: 60-950 mm
- Least Count: 1 mm
- Measurement Units: mm
- Measurement: Visually on Scale
