

Opacity Tester

Product Info :

Opacity Tester manufacturers and suppliers offer a very highly precise testing instrument that is used in different industries to test the opacity or transparency level of the products. In the plastic industry, there are different types of plastics manufactured for different purposes. They are used for various purposes in industries as well as in domestic usage. The manufacturers of plastic products have to attain different levels of quality for different types of plastics. One such property is the opacity level of the products.

For different purposes, there is a need for different levels of opacity; hence the manufacturers of the products have to tweak the whole manufacturing process to some extent so that they could easily attain the desired level of opacity. In order to ensure that, the manufacturers also need to run the opacity test on the plastics so that the exact level of opacity could be assured.

Pacorr is one of the best Opacity Tester manufacturers and suppliers offering the most precise testing instrument for the plastic industries to test the opacity of the products manufactured by them. The opacity of an object can be termed as the amount of light that an object allows to pass through it. This property of objects is expressed in percentage. For plastic industries, it is essential that they are able to provide different transparency levels for their products so that they could ensure usability of these products in their desired roles. To attain the desired level of transparency or opacity, there must be some significant changes done in the manufacturing process as well as the ingredients that are used for making the plastic products. But to determine how much change is required, it is essential to test the level of opacity that products have at a given point of time.

TECHNICAL DATA :

- Display: Digital (LED)
- Range: 0-99.9%
- Resolution: 0.01%
- Direct Displays: % Opaque
- Power: 230V AC, 50Hz
- Paint: Powder Coated
