

Motorized Wrap Reel

Product Info :

Motorized Wrap reel is a type of wrap reel that is powered by an electric motor. The motor drives the spindle, which rotates at a constant speed to wind the yarn or thread onto it. This type of wrap reel is often used in larger textile mills and factories, where a high volume of yarn or thread needs to be measured quickly and efficiently.

Motorized wrap reels can be more expensive than manual wrap reels, but they offer several advantages. They are faster and more accurate, and they require less manual labor. They can also be programmed to stop automatically when a certain length of yarn or thread has been wound, which can help to reduce waste and improve efficiency.

TECHNICAL DATA :

- Wheel circumference : 1.5 yards or 1 meter
- Number of leas made at a time : 5/10/14
- Spread of each lea : 20 mm + 5
- Counter Meter (Three digits) : Digital pre-set counter with sensor
- Operating speed : 100 + 5 rpm
- Motor : geared motor, 100 rpm, 1 phase.
- Overall dimension of the unit : LENGTH x WIDTH x HEIGHT
- 700mm x 660mm x 650mm
- 70cm x 66cm x 65cm
- Net weight of the unit : 58 kg (127.60 lb)
- Overall dimensions of cone unit : LENGTH x WIDTH x HEIGHT
- 500mm x 300mm x 580mm
- 50CM x 30CM x 58CM
- Net Weight of cone unit : 15 kg (33 lb)

Standard accessories

- Swift/wheel (1.5 yd or 1 meter) : 1 No.
- Yarn cone stand : 1 No.
- Mains Lead with Plug : 1 No.
- This User's Manual : 1 No.
- Calibration Certificate (Traceable to NABL): 1 No.
- Inspection & Conformance Certificate : 1 No
