

# Specific Gravity Balance

## Product Info :

Specific Gravity Balance manufacturers and suppliers offer the most accurate and precise testing instrument that can be used for measuring the specific gravity of different materials. The specific gravity is the property of a material that gives information about its constituents and the density of the materials. In industries, the properties of materials such as liquids and electrolytes are of great importance. These properties can be determined with the help of specific gravity. The specific gravity can be very helpful in finding out characteristics such as density, chemical constituents and so forth. If the manufacturers of such materials want to ensure the best quality of products, then they need to measure the specific gravity of the products with great accuracy and precision. The specific gravity is one of the most important features of any liquid such as chemicals, solutions and electrolytes.

acorr is one of the prominent specific gravity balance manufacturers and suppliers that have been offering the most accurate testing instruments to the industrial laboratories for quality testing of different materials and liquids. The specific gravity of liquids is important to measure as it gives a great information about the properties and characteristics about the liquids. With the help of the specific gravity, one can easily calculate the density, physical constituency and chemical properties of liquids being tested.

The specific gravity is the measure of the ratio of a liquid with the density of a reference liquid. This is mainly used in the chemical industries for measuring the electrical conductivity and chemical composition of liquid chemicals and solutions that are used in different industries for different purposes.

## TECHNICAL DATA :

- Model: PC-SAB-224CL with Density determination kit
- Capacity: 220gm
- Resolution: 0.0001gm (0.1mg)
- Pan Size: 90mm Diameter
- Calibration: External
- Single touch key external calibration ensures the highest accuracy.
- 18 Standard Units with all character marks
- Standard 1500V isolation USB port, ease to connect with PC.
- Backlit High Contrast display with 15mm digits.

## Our Valuable Customer

Pacorr Testing Instruments Pvt. Ltd.

11/15, Site-4 Industrial Area, Sahibabad, Ghaziabad- 201010 Contact No: +91-8882149230, Email Id: info@pacorr.com
