

## Cap Torque Tester- Ultra

The Pacorr Cap Torque Tester – Ultra is a high-precision instrument designed to measure the opening and closing torque of bottle caps and closures. It ensures consistent sealing performance, prevents leakage, and maintains product integrity. Ideal for quality control, it helps manufacturers comply with packaging standards and optimize closure application processes.

### Specification

- Torque Range: Up to 10 Nm (customizable as per requirement)
- Accuracy:  $\pm 1\%$  of full scale
- Display: Digital LCD/Touchscreen display
- Resolution: High-resolution torque measurement
- Operation Mode: Manual and automatic testing options
- Sample Type: Suitable for bottles, caps, and closures of various sizes
- Power Supply: 220V, 50 Hz
- Data Output: USB/PC connectivity for data logging and analysis
- Construction: Sturdy metal body with anti-slip base
- Safety Features: Overload protection and auto shut-off system

Model: PCBCTT-Ultra

### Features

- High-precision torque measurement for accurate cap testing
- Suitable for both opening and closing torque evaluation
- User-friendly interface with digital display for easy operation
- Compatible with a wide range of bottle and cap sizes
- Real-time data monitoring and quick result analysis
- Robust and durable construction for long-term reliability
- Consistent and repeatable test results
- USB/PC connectivity for data storage and reporting
- Safety features including overload protection and auto shut-off
