

## Vacuum Leak Tester (Dry and Wet)

The Pacorr Vacuum Leak Tester (Dry and Wet) is a versatile testing instrument designed to detect leaks in packaging using both dry vacuum and water immersion methods. It ensures seal integrity and product safety, helping manufacturers identify defects, prevent contamination, and maintain high-quality standards in flexible and rigid packaging applications.

### Specification

- Vacuum Range: Up to 600 mm Hg (adjustable)
- Test Modes: Dry (vacuum decay) and Wet (water immersion)
- Display: Digital vacuum indicator / analog gauge option
- Chamber Material: Transparent acrylic for clear visibility
- Chamber Size: Customizable as per sample requirements
- Control System: Manual or digital control options
- Power Supply: 220V, 50 Hz
- Sample Type: Flexible and rigid packaging materials
- Construction: Sturdy, corrosion-resistant body
- Safety Features: Vacuum regulator and pressure release valve

Model: PCVLT-Ultra

### Features

- Dual testing capability with both dry and wet (water immersion) methods
- Accurate detection of even minute leaks in packaging
- Transparent chamber for clear observation during wet testing
- Adjustable vacuum control for versatile testing needs
- Suitable for flexible and rigid packaging materials
- User-friendly interface for easy operation
- Quick and efficient testing process
- Consistent and repeatable results
- Robust construction for long-term durability
- Safety features including pressure release valve and secure sealing system
