

Vacuum Leak Tester for Pouches and Sachets

The Pacorr Vacuum Leak Tester for Pouches and Sachets is a precision instrument designed to detect leaks in flexible packaging. It uses vacuum-based testing to identify seal integrity issues, ensuring product safety and shelf life. Ideal for quality control, it helps manufacturers maintain packaging standards and prevent product contamination or leakage.

Specification

- Vacuum Range: Up to 600 mm Hg (adjustable)
- Display: Digital vacuum indicator / analog gauge option
- Chamber Material: Transparent acrylic for clear observation
- Chamber Size: Customizable based on sample requirements
- Test Method: Vacuum-based leak detection
- Control System: Manual or digital control options
- Power Supply: 220V, 50 Hz
- Sample Type: Pouches, sachets, flexible packaging materials
- Construction: Sturdy body with corrosion-resistant finish
- Safety Features: Vacuum regulator and pressure release valve

Model: PCVLTPS-2.0

Features

- Accurate vacuum-based leak detection for reliable results
- Transparent chamber for easy visual inspection during testing
- Adjustable vacuum control for different testing requirements
- Suitable for pouches, sachets, and flexible packaging materials
- User-friendly operation with simple controls
- Robust and durable construction for long-term use
- Quick and efficient testing process
- Consistent and repeatable results
- Safety features including pressure release valve and secure sealing system
