

Loop Tack Tester

The Pacorr Loop Tack Tester is a precision instrument designed to measure the initial tack strength of adhesive materials such as tapes, labels, and films. It ensures accurate and consistent results, helping manufacturers evaluate bonding performance and maintain product quality across various industrial and packaging applications.

Specification

- Test Type: Loop tack adhesion testing
- Load Cell Capacity: Up to 5 kg (customizable options available)
- Display: Digital display for accurate readings
- Accuracy: $\pm 1\%$ of full scale
- Test Speed: Standard ~ 300 mm/min (adjustable)
- Sample Width: Typically up to 25 mm (or as required)
- Power Supply: 220V, 50 Hz, single phase
- Construction: Robust and durable metal body
- Control System: Microprocessor-based for precision
- Data Output: USB/PC connectivity (optional)

Model: PCLTT-D

Features

- Precise measurement of initial tack strength of adhesives
- High accuracy load cell for consistent and reliable results
- User-friendly interface for easy operation
- Adjustable test speed for flexible testing requirements
- Suitable for tapes, labels, and adhesive films
- Robust construction for long-term durability
- Digital display for clear and accurate readings
- Ensures compliance with industry testing standards
- Low maintenance with efficient performance
