

Perforation Tester

The Pacorr Perforation Tester is a precision instrument designed to measure the strength and resistance of perforated materials such as paper, packaging films, and cartons. It ensures consistent tear performance and product quality by delivering accurate results, helping manufacturers maintain standards and optimize packaging efficiency across various industrial applications.

Specification

- Test Range: 0 to 50 N (customizable based on requirements)
- Resolution: 0.01 N
- Test Speed: Adjustable (as per ASTM/ISO standards)
- Display: Digital LCD with real-time force graph
- Grip Type: Pneumatic or manual clamp (optional)
- Power Supply: 220V AC, 50Hz
- Compliance Standards: ISO 8787, ASTM F88, F1306

Model: PCPT-01

Features

- Accurate measurement of perforation strength and tear resistance
- High precision mechanism for reliable and repeatable results
- Sturdy construction for long-lasting performance
- User-friendly design for easy operation
- Suitable for paper, films, and packaging materials
- Ensures consistency in perforation quality
- Compact design ideal for laboratory use
- Low maintenance with efficient performance
- Helps meet industry quality standards
