

## Vibration Table - Touch Screen

The Pacorr Vibration Table – Touch Screen is an advanced testing instrument designed to simulate transportation vibrations and assess packaging durability. Equipped with an intuitive touch screen interface, it ensures precise control and accurate results. Ideal for quality testing, it helps manufacturers enhance product safety and packaging performance during transit.

### Specification

- Control System: Touch Screen Digital Interface
- Vibration Mode: Vertical / Reciprocating
- Frequency Range: Adjustable
- Load Capacity: Customizable
- Table Surface: Heavy-Duty Platform
- Power Supply: Standard Industrial Power
- Test Duration: Programmable Timer
- Safety Features: Emergency Stop, Overload Protection

Model: PC-VT-TouchPro

### Features

- Touch screen interface for easy and intuitive operation
- Simulates real transportation vibration conditions
- Adjustable frequency and amplitude for versatile testing
- High precision control for accurate and repeatable results
- Robust construction for long-lasting performance
- Suitable for testing packaging, electronics, and fragile goods
- Compact design ideal for laboratory and industrial use
- Low maintenance with reliable performance
- Enhances product safety during shipping and handling
