

Textile Moisture Meter

The Pacorr Textile Moisture Meter is designed to measure the moisture content in various fabrics and textile materials. It provides quick and accurate readings, helping manufacturers maintain optimal moisture levels for quality control, processing efficiency, and storage, ensuring consistent product performance and durability.

Specification

- High-precision moisture sensing technology
- Wide measurement range for different textile materials
- Digital display for clear and accurate readings
- Rapid response time for instant results
- Portable and lightweight handheld design
- Easy calibration for reliable performance
- Low power consumption with long battery life
- Durable construction suitable for industrial use

Model: PCTMM-001

Features

- Provides fast and accurate moisture content measurement
- User-friendly interface for simple operation
- Portable design for convenient on-site testing
- Suitable for a wide range of textile materials
- Helps maintain quality and consistency in production
- Energy-efficient with extended battery life
- Durable build for long-term use
- Ideal for quality control, storage, and processing applications
