

Traverse Thread Counter

The Pacorr Traverse Thread Counter is a precision instrument designed for accurately counting threads in textiles and fabrics. Built with durable materials and a clear magnification lens, it ensures reliable measurements for quality control and inspection. Its ergonomic design makes it easy to use, making it an essential tool for textile professionals and laboratories.

Specification

- Magnification Range: Typically 10x (custom options may be available)
- Lens Type: High-quality optical glass lens
- Measurement Scale: Precisely engraved scale for accurate thread counting
- Body Material: Durable metal or high-grade plastic construction
- Illumination: Available with or without built-in LED lighting
- Foldable Design: Compact and portable with collapsible frame
- Application: Textile testing, fabric inspection, quality control labs
- Accuracy: High precision for thread density measurement
- Weight: Lightweight for easy handling and portability

Model: PCTTC-001

Features

- High-precision measurement for accurate thread counting in fabrics
- Clear magnification lens for enhanced visibility and easy inspection
- Durable construction ensuring long-term reliability
- Compact and portable design for convenient handling
- Easy-to-use interface suitable for quick testing operations
- Stable base for precise and vibration-free measurements
- Ideal for textile labs, quality control, and research applications
- Supports consistent and repeatable results in fabric analysis
