

## Silo Weighing System

The Pacorr Silo Weighing System is a precision-engineered solution designed to accurately measure the weight of materials stored in silos. It ensures real-time monitoring, improves inventory control, and enhances operational efficiency. Built for durability and reliability, it is ideal for industries requiring consistent and accurate bulk material management.

### Specification

- High-precision load cell technology for accurate weight measurement
- Robust and durable construction for industrial environments
- Real-time weight monitoring and data display
- Easy integration with existing silo systems
- Digital controller with user-friendly interface
- High load-bearing capacity (customizable as per requirement)
- Overload protection for enhanced safety
- Low maintenance and long service life
- Suitable for various bulk materials (powders, granules, liquids)
- Compatible with automation and control systems

### Features

- Provides continuous and accurate weight tracking
- Enhances inventory management and reduces material loss
- Supports remote monitoring and data logging
- Quick installation with minimal structural modification
- High stability and resistance to environmental factors
- Customizable design to fit different silo sizes and capacities
- Improves process efficiency and productivity
- Reliable performance with minimal calibration requirements
- User-friendly operation with intuitive controls
- Helps in better decision-making with precise data insights

### Our Valuable Customer
