

Manual Wrap Reel

The Pacorr Manual Wrap Reel is a dependable tool for preparing yarn samples with precision and consistency. It enables accurate measurement of yarn count by creating uniform wraps under controlled conditions. Ideal for textile laboratories and quality control, it ensures reliable results while offering simple operation and durable construction for long-term use.

Specification

- Standard reel circumference (typically 1 meter) for accurate lea formation
- Manual hand-operated mechanism for controlled winding
- Mechanical revolution counter for precise wrap counting
- Fixed number of wraps (commonly 80/100) as per testing standards
- Durable metallic construction for long-lasting performance
- Smooth rotating arms to ensure uniform yarn winding
- Provision for maintaining consistent yarn tension
- Stable base design for vibration-free operation
- Suitable for various yarn materials (cotton, wool, synthetic)
- Complies with standard textile testing norms

Features

- Delivers precise and uniform yarn wrapping for accurate testing
- Simple hand-operated design for ease of use
- Smooth rotation minimizes yarn damage during winding
- Robust and durable construction for long-term reliability
- Suitable for a wide range of yarn types and counts
- Ensures consistent results in yarn count measurement
- Compact and space-saving design for laboratory use
- Stable structure reduces vibration during operation
- Low maintenance with dependable performance
- Ideal for textile testing and quality control applications
