

Zip Endurance Tester

The Pacorr Zip Endurance Tester is designed to assess the durability and performance of zippers under repeated usage. It simulates real-life opening and closing cycles to evaluate strength, wear resistance, and reliability, making it ideal for testing zippers used in garments, bags, and other textile products.

Specification

- Motorized mechanism for consistent zipper cycling
- Adjustable stroke length and speed settings
- Digital counter to record number of cycles
- Sturdy frame ensuring vibration-free operation
- Suitable for testing various zipper types and sizes
- User-friendly control panel for easy operation
- Durable construction for long-term industrial use
- Low maintenance and energy-efficient design

Model: PCZET-001

Features

- Ensures accurate and repeatable zipper durability testing
- Simulates real-life opening and closing conditions
- Easy-to-use interface for quick setup and operation
- High testing efficiency with continuous cycle operation
- Suitable for a wide range of zipper materials and designs
- Robust construction for reliable long-term performance
- Minimal maintenance with consistent output quality
- Enhanced safety features for secure operation
