

## Light Fastness Tester- MBTL

The Pacorr Light Fastness Tester (MBTL) is a precision instrument designed to evaluate the resistance of materials to light exposure. It simulates sunlight conditions to assess color stability and durability, making it ideal for textiles, plastics, and coatings, ensuring products maintain quality and appearance over time.

### Specification

- Specifications:
- Advanced light simulation system for accurate testing
- Uniform light distribution across samples
- Digital control panel for easy operation
- Adjustable test duration and intensity
- Robust chamber with temperature control
- Suitable for textiles, plastics, paints, and coatings
- Compact and durable design for industrial use
- Complies with relevant testing standards

Model: PCLFT-001

### Features

- High-precision results with consistent repeatability
- User-friendly interface for quick setup and operation
- Energy-efficient lighting system
- Minimal maintenance requirements
- Reliable performance for long testing cycles
- Enhanced safety features for operator protection
- Versatile testing capability for multiple materials
- Sturdy construction ensuring long service life
