

Yarn Appearance Board Winder

The Pacorr Yarn Appearance Board Winder is designed to prepare uniform yarn wraps on boards for visual inspection and grading. It ensures consistent tension and even winding, helping assess yarn quality, shade variation, and defects. Built with sturdy construction and smooth operation, it is ideal for textile labs, mills, and quality control departments.

Specification

- **Test Function:** Used to prepare yarn samples on boards for visual inspection of evenness, hairiness, and defects
- **Operation Type:** Manual or motorized (model dependent)
- **Winding System:** Uniform winding mechanism for consistent yarn placement
- **Board Compatibility:** Designed to accommodate standard yarn appearance boards
- **Construction:** Sturdy metal body for durability and long-term use
- **Speed Control:** Adjustable winding speed (in motorized variants)
- **Power Requirement:** Electric (for motorized models)
- **Application:** Textile testing labs, yarn quality assessment, and research facilities
- **Output:** Produces uniform yarn wraps for accurate visual grading and comparison

Features

- Ensures uniform yarn winding on appearance boards for accurate visual evaluation
- Helps detect yarn defects such as unevenness, hairiness, and neps
- Provides consistent tension control for reliable sample preparation
- Sturdy and durable construction for long-term industrial use
- Smooth and stable operation for precise winding performance
- Suitable for both manual and motorized operation (model dependent)
- User-friendly design for quick and efficient testing
- Ideal for textile laboratories, yarn grading, and quality control applications

Model: PCYABW-001
