

Tape Adhesion Tester

The Pacorr Tape Adhesion Tester is designed to evaluate the adhesive strength of pressure-sensitive tapes, labels, and coatings. It provides accurate and consistent results to ensure product quality and performance. Ideal for laboratories and industrial use, it helps manufacturers maintain reliable adhesion standards and improve overall product durability.

Specification

- Precision-engineered mechanism for accurate adhesion testing
- Suitable for pressure-sensitive tapes, labels, and coated surfaces
- Standardized test method compliance (e.g., peel/adhesion tests)
- Adjustable testing angle and speed (as per requirements)
- Rigid and stable base structure for consistent results
- Analog or digital force measurement options
- Corrosion-resistant construction for long durability
- Easy sample mounting and removal system
- Compact and user-friendly design
- Low maintenance with reliable performance

Model: PCTAT-001

Features

- Accurately measures adhesive strength of tapes and labels
- Ensures consistent and repeatable test results
- User-friendly design for easy operation
- Quick sample mounting and testing process
- Compact and space-saving structure
- Durable construction for long-term use
- Suitable for quality control and research applications
- Provides reliable performance with minimal maintenance
- Helps maintain product consistency and adhesion standards
- Ideal for laboratory and industrial environments
