

Notch Cutter Manual

Product Info :

Notch Cutter-Manual manufacturers and suppliers offer a very special instrument that is mainly used in industrial labs to test the quality of the products with accuracy and precision. In the plastic industries, there are many different concerns related to quality of the products produced that need to be tested thoroughly. The plastic products are used for many different tasks in the industries as well as in the domestic realm. There are various types of stresses, and forces acting upon the products which can have a great impact on their strength and service life. The manufacturers of such products need to ensure that the plastic products manufactured by them are of such quality that they are able to bear the impact exerted upon them and do not fail or break during usage. In order to test that, there is a test conducted called IZOD impact test which measures the resistance of the plastics against the impacts that is exerted on them and causes

breaking or fracture. For conducting this test, it is important that the specimen prepared for the testing procedure is according to the prescribed standard otherwise it can compromise the accuracy of data. THE notch cutter-manual offered by Pacorr can be a very precise instrument that is used for preparing of specimen for the testing procedures in the packaging industries. Pacorr is one of the best Notch Cutter-Manual manufacturers and suppliers that offer the most precise testing instrument for industries such as plastic industries. In the plastics industries, the quality of products is of great importance as the products are used for different purposes in the industries and also in the domestic areas. The testing procedure helps in ensuring the best strength of the plastics and hence enhances the quality of the products.

TECHNICAL DATA :

- Manual Operated
- Depth Micrometer by wheel and resolution of 0.01mm.
- Range: 0-25mm
- L.C.: 0.01mm
- Cutting Angle: 45deg.
- Paint: Powder Coating
