

Transparency Tester

Product Info :

Transparency Tester manufacturers and suppliers ensure the best quality testing instrument for industries dealing in transparent products such as bottle and containers. IN the PET industries where there is manufacturing of PET bottles and containers, it is essential that the quality of these containers is of best quality so that they could ensure the best level of safety to the products and substances that will be packaged in those bottles and containers. The manufacturers of such products must ensure that they run all the quality tests on the products to ensure best quality of products delivered to the customers. One of the most important aspects of quality of the PET bottle sand containers can be the transparency of the walls of the bottles. There varying grades of transparency that are required for different kinds of bottles as the transparency level of the bottles can have a great impact on the quality of products inside

the bottles. This is why, the manufacturers need to ensure the most optimum level of transparency that is required for a particular bottle. For this, the transparency tester is used. Pacorr is one of the best Transparency Tester manufacturers and suppliers that are active in India and have been providing the best precision transparency tester for industrial usage. IN the industries such as PET and preform, there are many different aspects of quality that need to be observed and controlled in order to ensure the best quality of the final products. First step for making any PET bottle is the preform. The preform is used for blowing and converting it into a bottle or a container. Now the transparency of the preform can give a lot of information about the quality. Any type of defect in the physical properties of the preform can be easily detected with the help of transparency test of the preforms.

TECHNICAL DATA :

- Material: Aluminium- Powder coated
- Measuring range: 0.0 to 100.0%,
- Least count: 0.1%
- Size of the specimen: 50mm x 50mm
- Power supply: 220V AC
- Frequency: 50 Hz
