

# Eccentricity Tester Digital

## Product Info :

**Eccentricity Tester Digital** manufacturers and suppliers offer the most important tools for the PET industries to check the shape of the PET bottles and preforms. In the PET industries, the only thing that matters is the properties and quality of the PET bottles that are being manufactured and delivered to various other industries for packaging of their products. These PET bottles are required to have the best strength and sealing capacity so that they could be able to provide the best level of safety for the products. The manufacturers of the products must ensure that the manufacturing process for the bottles should not have any loopholes that might compromise with the quality of the end products. In any case if the PET bottles are not of good quality, they can pose a threat to the safety and integrity of the products that present inside them. In order to ensure best quality of bottles, the best quality of preforms is also required.

The manufacturers need to test the quality of the preforms that are being used for manufacturing of PET bottle. Eccentricity of the preform is a big aspect of properties of the preforms that can have a great impact on the bottles. The Eccentricity Tester Digital is the best testing instrument that can help in testing the preforms with great accuracy.

Pacorr comes under the best Eccentricity Tester Digital manufacturers and suppliers and have been dedicated to provide the best quality testing solutions for the PET and preform industry. In the PET industry, most of the containers and bottles that are produced are used for packaging of products that are delicate and vulnerable of not handled with utter care. IN addition to that, the preforms used for making bottles must also be tested for their quality and accuracy.

## TECHNICAL DATA :

- Range – 0-12mm
- Accuracy – 0.1%
- Least count – 0.001mm
- LCD Display – Digital
- Approx. Weight – 4Kg
