

Moisture Meter- Delmhorst P-2000

Product Info :

Pacorr is one of the finest Moisture Meter- Delmhorst P-2000 manufacturers and suppliers providing the best accuracy moisture meters to the industries where they are required. Moisture is a great factor that has an extensive impact on the quality and performance of different products and materials. Moisture can cause the materials to lose their molecular properties and binding integrity which can prove to be lethal for quality of the products. This is why the manufacturers of different products must ensure that the moisture level of their products is not more than required. The Moisture Meter-Delmhorst P-2000 is the best instrument to measure the level of moisture in any material and products. The Moisture Meter- Delmhorst P-2000 manufacturers and suppliers make the best accuracy instruments that are capable of providing most accurate level of moisture in a given material.

The impact of moisture is very intense on many different materials and products. Materials such as wood, paper, corrugated sheets and many others are greatly impacted by the presence of moisture in them. {Presence of moisture in them beyond certain level can harm the molecular integrity of the products and can bring change to the physical properties hence the manufacturers of these products need to ensure that moisture level in the products is of optimum level so that the physical properties of the products are retained. With the measurement of the moisture, it is possible to predict its behaviour in different environments with different moisture levels. Additionally, it is also helpful in determining the shelf life of the materials as well. Mostly in paper and packaging industry, the moisture can cause an extensive damage if the moisture level increasing from a certain point.

TECHNICAL DATA :

- Instrument Size – Portable carried in a case
- Power Supply – 110 / 220 VAC, 50/60 Hz
- Moisture range:
- 4.3% to 18% for Paper
- 8% to 40% baled scrap paper
- Display – LCD Display

FEATURES :

- Easily Handled and portable device
- Good repeatability
- High Test range
- Digital LCD display or clear test readings.
